Problem Statement

There is not a widespread, interactive way for college students to manage their time, all in one place.

Details:

An app for college students that allows them to input their schedules, as well as any tasks they would like to complete. The app will then show their available time that they aren't already doing something, and ask them when they would like to complete the given task. When that time arrives, the app will send a notification to the student's phone, reminding them to do their tasks.
